Summary:

Enthusiastic and detail-oriented React Native Developer with 10 months of hands-on experience, including a 6-month internship and 4 months as a full-time developer. Proven ability to design, develop, and maintain high-performance mobile applications for both Android and iOS platforms. Skilled in collaborating with cross-functional teams, optimizing app performance, and delivering user-friendly solutions. Fast learner and adaptable to new technologies and frameworks. Capable of working independently as well as effectively in a team environment. Experienced in debugging, testing, and deploying production-ready features across multiple live projects.

SKILLS:

- HTML
- CSS
- JavaScript
- Bootstrap
- Tailwind css
- jQuery
- React JS
- Reat Native

EDUCATION:

Integrated MSC. IT
Silver Oak University 2020-2024
CGPA :- 8.77

12th Standard, Gujarat Board
Triveni Vidhyalaya(commerce)
2020 :- 62%

10th Standard, Gujarat Board
Triveni Vidhyalaya
2018 :- 62%

CERTIFICATION:

Frontend Developerment with ReactJS:- KICT,
10/02/2024

Web development with PHP & ReactJS:-
Tecnmicra, 16/01/2024

Work Experience:

At BM Coder Company, I had the opportunity to contribute actively to React Native development, starting with a 6-month internship and continuing for 4 months as a full-time employee. I worked on six live projects, each with unique requirements and challenges, focusing on performance optimization, debugging, and testing. Collaborating closely with UI/UX designers and backend developers, I ensured high-quality code and timely project delivery. These experiences significantly deepened my expertise and improved user satisfaction across our mobile applications. You can learn more about my journey here.

PROJECTS:

Dating App: Contributed to a live dating app project during my internship at BM Coder, using React Native to deliver a smooth cross-platform experience. Designed responsive UI components and integrated RESTful APIs to communicate with backend services for efficient data handling and real-time user interactions. Implemented user-centric features such as swipe gestures and geolocation-based matching, which significantly improved user engagement and retention.

Music App: Developed a static music app using React Native, leveraging Redux for state management and integrating APIs for seamless music playback and library management. Designed responsive UI components and optimized performance for both iOS and Android platforms. Implemented caching mechanisms to enhance offline functionality and collaborated closely with designers to ensure a polished user interface.
